# The VoltLock

Level II Concealed EVSE Pole

The VoltLock Concealed Level II EVSE Pole was designed with the needs of the city in mind. The cavities within the base of the pole for concealing electric vehicle supply equipment provide a tamperproof solution with a clean aesthetic by containing the cable and connector of the charging stations typically in use within the sleek lines of the concrete pole.

## Features & Benefits

- **Tamperproof Access**
  - » Controlled access to EV charging equipment
- **Flexible EVSE**
  - » Compatible with various EVSE suppliers
  - » Able to use preferred vendor
- **Aesthetically Pleasing**
  - » Clean aesthetic
  - » Blends into streetscape
- **Concealed Equipment**
  - » Vulnerable components protected from elements
  - » Main charging equipment access separated from user access to connector & cable reel
- **Convenient Storage**
  - » Charging cable housed on retractable reel to ensure convenient, consistent, and secure storage to reduce damage caused by user error

# Made To Order

## 1 . Pole Height

Available in above grade heights ranging from 18' to 32'

## 2 . Finish & Color

Available in an Etched finish and a variety of colors, including Midnight Lace, Eclipse Black, Salt & Pepper, Pearl Gray, and Saluki Bronze.

## 3 . Customizable Options

Able to be customized with post top or pendant fixtures, as well as decorative options like banner arms.

## How It Works

### Park & Unlock

Park your EV beside the VoltLock, then unlock the charging equipment using your access card or mobile phone.

### Lift Door & Remove Handle

After accessing, the cover will unlock allowing you to lift the door and retrieve the charging handle. Pull out the cable to required distance to charge.

### Plug-In & Charge

Plug the charging handle into your EV and charging will automatically begin.

### Disconnect & Return Cable

After charging is complete, disconnect the charging handle from your EV. With a quick tug, the cable reel will retract and wind the cable within the pole.

### Secure Handle & Close Door

With the cable completely retracted, the charging handle securely fits into the holder. Close the door to lock the charging equipment in place.

### Drive Away

With the equipment in place and the door closed, the EV charging equipment is securely stored and your transaction is complete. You are free to go on your way.
