Siren Poles

Siren Poles:

In the midst of natural disasters throughout the world, early warning systems are vital.

Siren poles are typically used by municipalities/counties for tornado or hurricane warning systems, and are also used by nuclear facilities in the event of a disaster. It is therefore imperative that the sirens be mounted on an extremely durable pole that will endure severe weather conditions. Our Concrete poles are made to order and are designed according to your specifications.

Benefits of Concrete

- High quality manufacturing practices ensure great performance and look
- Strength and durability
- Lifetime warranty
- Optional decorative coloured aggregate
- Optional Anti-graffiti coating on coloured poles
- Zero maintenance
- Minimizes vibration which is critical to Camera reliability and picture quality
- Cost savings due to direct embedment installation
