StressCrete® GROUP

We are a family business focused on creating opportunities for our employees and improving the communities we serve. We are building the foundation of enhanced, more livable cities.

StressCrete Group services multiple market segments, including Municipal, Department of Transportation, Transmission & Distribution, Sports Lighting, and more, through four divisions: StressCrete, King Luminaire, KingCast, and Spartan Sports Lighting.

Established in 1953, StressCrete is the oldest and most experienced manufacturer of spun concrete poles in North America operating from three facilities strategically located in Alabama, Kansas, and Ontario. From here, we serve customers across the continent with the broadest, most diverse range of made-to-order pre-stressed spun concrete poles.

King Luminaire produces a comprehensive assortment of high-performance outdoor luminaires, metal poles, pole arms, bollards, and site amenities. With an array of state-of-the-art LED technology, the most advanced technical knowledge available, plus state-of-the-art equipment, we aim to manufacture the highest quality product possible. With plants in Ohio and Ontario, King Luminaire is a North American leader in the outdoor lighting industry.

KingCast designs and produces zinc and aluminum permanent cast products, as well as expanding our reach to outside industries, such as transportation, energy, utility, and many others. Located in Ontario, KingCast provides a seamless flow from initial design and tooling, to cast products and powder coat finishing in-house with end-to-end machining.

Spartan Sports Lighting provides a complete turnkey solution for any application regardless of field type, size, level of play, or existing site amenities. Manufactured in the United States and easy to install, Spartan Sports Lighting is the high-performance solution you will be proud to put on the field.

At StressCrete Group, we provide every customer with the highest quality innovative products and work as a team to create and maintain life-long customers through world class service. Our goal is to offer our customers the highest level of service and technical support possible.

KING LUMINAIRE

King Luminaire, a division of StressCrete Group, proudly manufactures an extensive line of decorative metal arms in a variety of styles.

King Luminaire's skilled team of metal fabricators, certified welders, CNC machinists, plasma cutters, and in-house powder coating experts produce metal poles, pole arms, and custom designs to accessorize StressCrete concrete poles and King Luminaire's lighting solutions while also providing custom products to external third-party customers.

When combined with King Luminaire's high-performance outdoor fixtures and selection of steel and aluminum poles and StressCrete's decorative concrete poles, King Luminaire's diverse product range has cemented our position as a leader in the North American outdoor lighting market.

ARMS

POWDER COATING

KINGCOAT™

King Luminaire offers incredible powder coating options for our top-quality products. We apply an extremely durable exterior polyester powder blend of non-volatile ingredients in a dry process, which is then fused into a continuous film through heat. This warranted coating provides an exceptional finish with a variety of color options, outstanding outdoor durability, and superior corrosion and barrier protection. To ensure the highest quality, our coatings undergo extensive QC testing, including 4,000 hours of salt spray exposure.

For arms installed in highly corrosive environments, such as seaside communities with salty air, we offer a dual coating. This additional layer helps maintain the integrity of our KingCoat™ colors, ensuring they stay vibrant and durable for years to come.

Our finishing options provide reliable protection, excellent chemical resistance, and superior hardness, all available in a wide range of colors. Depending on the color selection, finishes are offered in textured or smooth options, with **custom color matching available to meet specific project needs.**

KINGCOAT™ | POPULAR COLOR SWATCHES*

* KingCoat™ color samples shown are an approximate representation. Paint chip samples and custom color matching available upon request.

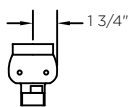

ARMS

LUMINAIRE MOUNTING

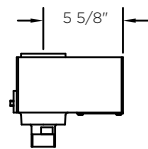

PENDANT | LEVELING DEVICES

The King Luminaire KPL Leveling Devices provide the mounting connection between arms and pendant luminaires, ensuring a secure fit and proper alignment. They are available in a variety of decorative options to complement different fixture styles and streetscape designs. For added functionality, photo controls are available with some configurations, offering enhanced energy efficiency and convenience.
